JETP LETTERS

A semimonthly periodical

In 1958, the need for rapid publication of important new findings led to the establishment of Physical Review Letters.

Similar developments in the USSR saw separate publication of the Letters section of the leading Russian physics journal, *Zhurnal Eksperimental'noi i Teoreticheskoi Fiziki.* (translated as SOVIET PHYSICS—JETP)

This letters journal, *ZhETF Pis'ma v Redaktsiyu,* has in fact achieved marked reduction in publication time for its Soviet contributors. Complementing the Russian effort, the American Institute of Physics publishes the translation, **JETP LETTERS,** ***four weeks after airmail receipt of the Russian original.***

Physicists keeping abreast of current Soviet research developments are urged to subscribe.

AMERICAN INSTITUTE OF PHYSICS

INCORPORATED

335 East 45 Street New York, New York 10017

THE AMERICAN INSTITUTE OF PHYSICS was founded in 1931 as a federation of leading societies in the field of Physics. It combines into one operating agency those functions on behalf of physics that can best be done by the Societies jointly. Its purpose is the advancement and diffusion of the knowledge of physics and its application to human welfare. To this end, it publishes for itself or the Societies the 16 journals listed on this page, as well as the 13 translations of Soviet journals; promotes unity and effectiveness of effort among all who are interested in physics; renders numerous direct services to physicists and to the public; and cooperates with government agencies, national associations, educational institutions, technical industries, and others in such manner as to realize the opportunities and fulfill the responsibilities of physics as an important and constructive human activity.
